OCT 18 1923

INTRODUCTION

This bulletin, the seventh of the series, gives for Ontario the results of the Census of Agriculture, taken as of June 1, 1921. In tables I to XI the figures of the Census of 1921 are compared with those of 1911 and in some instances with those of 1901. The returns of fruit, live stock and animal products not on farms were collected separately in 1921 and are so shown in these tables. They are also included in the totals for comparison with the 1911 Census, in which they are included but not separately presented. Tables XII to XVII present farm statistics by counties. The figures in this bulletin are subject to revision.

Number and Size of Farms.—The number of occupied farms of one acre and over in 1921 (Table I) was 198,053, as compared with 212,108 in 1911 and 204,054 in 1901. Farm acreage in 1921 was 22,628,901, as against 22,171,785 in 1911 and 21,349,524 in 1901, which represents a gain of 822,261 acres or 3·9 per cent from 1901 to 1911, and of 457,116 acres or 2·1 per cent from 1911 to 1921. The average size of farms in 1921 was 114·3 acres, as compared with 104·5 acres in 1911 and 104·6 acres in 1901. The following statement shows the per cent distribution of farms by size in 1911 and 1921.

	Per cent			Per cent	
	1921	1911		1921	1911
All occupied farms	100·0	100·0	51–100 acres	37·7	36·9
Under 5 acres	4·2	8·9	101–200 acres	29·4	25·9
5–10 acres	3·9	4·2	201 acres and over	8·2	7·0
11-50 acres	16·6	17·1			

Tenure of Farms.—The number of farms occupied by tenants in 1921 (Table III) was 20,199 or 10·2 per cent of all farms, as compared with 29,102, or 13·7 per cent in 1911. The decrease in the number of farms occupied by tenants during the decade was 30·6 per cent. The decrease in the total number of farms in the same period was 6·6 per cent. The number of farms occupied by part owners and part tenants in 1921 was 9,128, as compared with 8,904 in 1911, showing an increase of 2·5 per cent. To obtain acreage rented, the total acreage of farms occupied by tenants has been added to the rented portions of farms occupied by part owners, part tenants. This gives a total of 2,566,582 acres in 1921, forming 11·3 per cent of total farm acreage in that year, as compared with 2,979,078 acres in 1911, or 13·4 per cent of the total acreage. The number of farms occupied by managers in 1921 was 1,538 with an acreage of 235,665.

Value of Farm Property.—The value of all farm property in 1921 was $1,691,529,868, as against $1,223,701,549 in 1911 (Table IV). This shows an increase of 38·2 per cent, but in considering this increase, the difference between the price levels of 1911 and 1921 must be kept in mind. The largest increase (118·6 per cent) was in the value of implements and machinery the smallest (6·8 per cent) in the value of live stock. Land increased in value by 30·0 per cent and buildings by 56·3 per cent. In 1921 the value of land was $795,397,607 or 47·0 per cent of all farm property; the value of buildings was $491,329,609 or 29·0 per cent; implements and machinery $169,953,547 or 10·0 per cent; and live stock, $234,849,105 or 14·0 per cent. In 1911 the value of land was $611,756,794 or 50·0 per cent of all farm property; buildings were valued at $314,377,168 or 25·6 per cent of the total; implements and machinery at $77,734,449 or 6·4 per cent; and live stock at $219,833,138 or 18·0 per cent.

Condition of Farm Land.—The area of improved land in 1921 was 13,169,359 acres, as compared with 13,653,216 acres in 1911 and 13,266,335 acres in 1901. The area of field crops in 1921 was 9,165,203 acres, as against 9,683,307 acres in 1911 and 9,212,478 acres in 1901. The area in orchard was 180,617 acres in 1921, as compared with 279,011 acres in 1911 and 267,112 acres in 1901. There were 9,033 acres in small fruits in 1921. The corresponding figure for 1911 was 12,973 acres.

Area of Field Crops.—In 1911 and 1921 the enumerators obtained the areas sown to the various crops for the census year, together with the areas sown, the yield and value of the crops for the preceding year. The Census of 1901 being taken as of date April 1, information as to the areas sown for the census year was not available.

A comparison of the acreages of the various field crops in 1900, 1910, 1911, 1920 and 1921 (Table VI) shows hay and oats as the crops chiefly sown in each of these years. In 1900 the acreage of oats was greater than that of hay, being 2,707,357, as against 2,606,316, but the latter crop led in each of the other years. Wheat was third in acreage in each year, but showed a considerable decline from 1,487,633 acres in 1900 to 870,354 acres in 1910 and 850,525 acres in 1920. Corn was fourth in every year listed except 1900, when peas occupied that position. The latter crop showed a marked decline in area from 1900 to 1920, being only 79,773 acres in the latter year, as compared with 321,996 acres in 1910 and 586,857 acres in 1900. There was,

however, a corresponding though slighter increase in the area under mixed grain, which advanced from 117,020 acres in 1900 to 323,409 acres in 1910 and 494,754 acres in 1920. The acreages of the leading crops in 1920 and 1921, and the proportions which they formed of the total area under field crops were as follows:—

	Acreage		Per cent distribution of acreage of all field crops	
	1920	1921	1920	1921
All field crop	9,087,906	9,165,203	100·0	100·0
Hay	3,340,512	3,439,112	36·7	37·5
Oats	2,760,679	2,850,854	30·4	31·1
Wheat	850,525	692,172	9·4	7·6
Corn	555,341	565,649	6·1	6·2
Mixed grains	494,754	546,448	5·4	6·0
Barley	403,065	412,483	4·4	4·5
Potatoes	156,082	165,580	1·7	1·8
Buckwheat	115,036	114,260	1·3	1·2
Peas	79,773	83,183	·9	·9

Yield of Field Crops.—Table VII furnishes a comparison of the yields of the various field crops in 1910 and 1920, and shows also the increase per cent and the average yield per acre in each of these years. In spite of a slightly larger acreage, the production of hay in 1920, amounting to 3,567,771 tons, was less than in 1910, when it totalled 4,522,574 tons. The decrease was due to a lower average yield per acre, the figure for 1920 being 1·07 tons, as against 1·39 tons in 1910. Oats, on the other hand, with an acreage slightly less in 1920 than in 1910, showed a larger yield, 97,484,542 bushels as compared with 89,936,041 bushels. The average per acre was 35·3 bushels in 1920 and 31·3 bushels in 1910. The yield of wheat in 1920 was 16,440,213 bushels as against 19,842,626 bushels in 1910. The decreased yield in 1920 was due to a somewhat smaller acreage and a lower average production. There were 10,481,835 bushels of corn and 2,964,712 tons of fodder corn (green weight) produced in 1920, as against 13,830,703 bushels and 2,296,841 tons in 1910.

Value of Field Crops.—The value of all field crops in 1920 (Table VIII) was $235,553,330, as compared with $140,786,055 in 1910, an increase of 67·3 per cent, for which the difference in price level is, on the whole, accountable. Hay was the most valuable crop in each year, with oats, wheat and corn following in the order named. The values of these crops in 1920, and the percentage which they formed of the value of all field crops, was as follows:—

	Value in 1920	Per cent of total
All field crops	235,553,330	100·0
Hay	69,976,393	29·7
Oats	54,157,008	23·0
Wheat	30,457,005	13·0
Corn—for forage	13,562,896	5·7
Corn—for husking	6,530,639	2·8
Corn—Total	20,093,535	8·5
Total of these four crops	174,983,941	74·2

Fruit and Maple Syrup.—The fruit reported in the Census of 1921 was the production of 1920; the maple syrup and sugar for the spring of 1921, and the fruit trees were those standing at the time the census was taken in June, 1921. The figures for the Census of 1911 were collected on a similar basis.

The apple is the most important fruit in Ontario. In 1920 the value of apples amounted to 68·0 per cent of the value of all orchard fruits and to 39·2 per cent of the value of all fruits and maple syrup. The number of apple trees in 1921 was 5,724,620 as compared with 8,783,609 in 1911. Non-bearing trees, however, formed a much smaller proportion of the total in 1921 than in 1911. This change in proportion between bearing and non-bearing tees may be partly accounted for by a difference in the schedules, that of the Census of 1921 making it clearer that the distinction was one of age. The production of apples in 1920 was 9,662,425 bushels, as compared with 6,459,151 bushels in 1910. There were 983,194 bushels of peaches produced in 1920, as against 600,187 bushels in 1910; 538,261 bushels of plums and prunes, as compared with 346,944 bushels in 1910; 377,775 bushels of pears, as compared with 423,568 bushels; and 345,526 bushels of cherries, as against 146,440 bushels.

Grapes yielded 33,114,454 pounds in 1920. This was a very slight advance on the 1910 figure, which stood at 32,594,451 pounds. The strawberry is the most important of the small fruits. The yield of this fruit amounted to 11,362,041 quarts in 1920, as against 13,094,462 quarts in 1910. The production of raspberries in 1920 was 6,212,242 quarts, the figure for 1910 not being separately given. Currants and gooseberries totalled 1,082,623 quarts in 1920, as compared with 2,420,811 quarts in 1910. There were 501,299 gallons of maple syrup and 63,919 pounds of maple sugar produced in 1921, as against 766,337 gallons of syrup and 251,088 pounds of sugar in 1911.

The value of all orchard fruits in 1920 was $9,574,066. The corresponding figure for 1910 was $5,564,133. Small fruits and maple syrup totalled $7,055,952 in 1920, as against $3,086,391 in 1910. The value of all fruits and maple syrup was $16,630,018 for the year 1920-21, as compared with $8,650,524 in 1910-11, showing an increase of 92·2 per cent.

Stock sold alive and slaughtered.—The value of stock slaughtered on the farm in 1920 was given as $19,768,561, as compared with $9,474,294 in 1910, showing a gain of 108·7 per cent. The number of each kind was not given for 1910. The value of stock sold alive in 1920 was $79,074,656; the figure for 1910 was $76,490,854, but a comparison for the two years cannot properly be made as the returns for 1920, in order to avoid duplication, were limited to animals raised on the farm from which sold.

Animal Products.—These include dairy products, eggs, wool, honey and wax. The quantity of milk produced was given as 4,334,833,782 pounds in 1920, as compared with 4,295,977,547 pounds in 1910, showing an advance of less than one per cent. The production on farms in 1920 was 4,230,424,122 pounds, constituting 97·6 per cent of the total. The number of cows milked on farms was reported as 957,491, so that the average production per cow was 4418·2 pounds. The value of milk produced in 1920 was $96,952,181, or an average of 2·2 cents per pound. This value was calculated from that of the dairy products sold. It showed an increase of 123·4 per cent over the value for 1910, which was $43,301,044, averaging 1·0 cents per pound. There were 33,512,073 pounds of home-made butter produced in 1920, as compared with 63,253,444 pounds in 1910.

The total number of eggs produced in 1920 was 56,280,464 dozen, as compared with 58,888,614 dozen in 1910, showing a decrease of 4·4 per cent. Of the total quantity in 1920, there were 45,959,808 dozens, or 81·7 per cent produced on farms and 10,320,656 dozen or 18·3 per cent, elsewhere than on farms. The total egg production of 1920 was valued at $26,498,249, or 47·1 cents per dozen, as compared with $10,725,733, for 1910, averaging 18·2 cents per dozen. The increase in the total value was 147·1 per cent.

There were 528,287 sheep shorn in 1920 and 3,864,606 pounds of wool obtained. This quantity showed an increase of 40·0 per cent over the figure for 1910, which was 2,760,110 pounds. The value of wool in 1920 was $1,014,646, or 26·3 cents per pound, as compared with $607,014 for 1910, averaging 22·0 cents per pound, an increase in the total value of 67·2 per cent.

The quantity of honey produced on farms in 1920 was 3,146,198 pounds, while the production of wax totalled 42,060 pounds. Elsewhere than on farms, there were 977,291 pounds of honey and wax produced, making the total quantity of honey and wax for the province 4,165,549 pounds, of which 76·5 per cent was on farms and 23·5 per cent elsewhere. The production in 1910 was 4,521,740 pounds. The value of honey and wax in 1920 was $1,035,789, as compared with $516,658 in 1910. The decrease in quantity from 1910 to 1920 was, therefore, 7·9 per cent, and the increase in value, 100·5 per cent.

Live Stock, June 1, 1921.—The number of horses and mules in the province on June 1, 1921, was 720,869, of which 669,247, or 92·8 per cent, were on farms, and 51,622, or 7·2 per cent, elsewhere than on farms. The total number for 1911 was 812,214, so that the 1921 figure shows a decrease of 91,345 head, or 11·2 per cent. The number of mules is negligible. The value of horses and mules in 1921 was $90,176,979, as compared with $113,540,859 in 1911, showing a decrease of 20·6 per cent. This gives a slightly lower average value for horses in 1921 than in 1911. The classifications by age, etc., in the two years are not similar, hence it is impossible to make a comparison in average value by classes.

Cattle numbered 2,674,875 in 1921, as against 2,501,536 in 1911 an increase of 6·9 per cent. The value of cattle increased by 49·8 per cent, from $81,484,809 in 1911 to $122,030,212 in 1921. Milch cows numbered 1,090,866 in 1921, as against 1,032,996 in 1911. Of the total number of milch cows in 1921 there were 1,065,049 on farms and 25,817 elsewhere than on farms.

The number of sheep and lambs in 1921 was 979,422, as compared with 742,188 in 1911. The value was $6,901,043 in 1921, as against $4,427,565 in 1911. The increase in the number reported was thus 32·0 per cent, and in the value, 55·9 per cent.

Swine numbered 1,417,705 in 1921, as against 1,887,451 in 1911, a decrease of 24·9 per cent. The value of swine in 1921 was $14,923,304, which, as compared with the 1911 value, $13,577,817, showed an increase of 9·9 per cent.

There were 18,623,777 hens and chickens reported in 1921. This was an increase of 38·8 per cent over the 1911 Census, which showed, 13,414,318 hens and chickens. Turkeys decreased from 416,705 in 1911 to 373,437 in 1921; ducks increased from 293,662 in 1911 to 327,206 in 1921; geese decreased from 364,295 in 1911 to 315,200 in 1921. The value of all poultry in 1921 was almost double that in 1911, being $12,134,564, as compared with $6,128,401.

There were 107,553 hives of bees in 1921, as against 124,082 in 1911. Their value in 1921 was $1,169,754, as compared with $673,687 in 1911. The decrease in number was thus 13·3 per cent, and the increase in value, 73·6 per cent.

2

INTRODUCTION

Ce bulletin, le septième de la série, donne le résultat du recensement agricole d'Ontario, effectué à la date du 1er juin 1921. Une comparaison est établie dans les tableaux I-XI, entre les chiffres du dernier recensement et ceux de 1911, et aussi parfois ceux de 1901. Les rapports des fruits, du bétail et des produits animaux, non dans les exploitations agricoles, ont été recueillis séparément en 1921, comme l'indiquent ces tableaux. Ils sont compris dans les totaux pour fins de comparaison avec le recensement de 1911, mais non séparément présentés. Les tableaux XII-XVII donnent les statistiques des fermes par comtés. Les chiffres du présent bulletin sont sujets à revision.

Nombre et superficie des exploitations agricoles.—Le nombre des exploitations agricole d'une acre et plus en 1921 (tableau I) était de 198,053, comparativement à 212,108 en 1911 et à 204,054 en 1901. La superficie des exploitations agricoles en 1921, était de 22,628,901 acres, contre 22,171,785 acres en 1911 et 21,349,524 acres en 1901, représentant un gain de 822,261 acres ou 3·9 pour cent de 1901 à 1911 et de 457,116 acres ou 2·1 pour cent de 1911 à 1921. La superficie moyenne des exploitations agricoles en 1921, était de 114·3 acres, comparativement à 104·5 acres en 1911 et à 104·6 acres en 1901. Les chiffres suivants indiquent la répartition proportionnelle des exploitations agricoles selon leur étendue, en 1911 et 1921:—

	Pour cent			Pour cent	
	1921	1911		1921	1911
Toutes exploitations agricoles	100·0	100·0	11-50 acres	16·6	17·1
Moins de 5 acres	4·2	8·9	51–100 acres	37·7	36·9
5-10 acres	3·9	4·2	101–200 acres	29·4	25·9
			201 acres et au-dessus	8·2	7·0

Tenure des fermes.—Le nombre de fermes exploitées par des locataires en 1921 (Tableau III) était de 20,199, ou 10·2 pour cent de la totalité, comparativement à 29,102 ou 13·7 pour cent en 1911. La diminution dans le nombre de fermes exploitées par des locataires durant cette décade était de 30·6 pour cent. La diminution dans le nombre total des fermes durant cette même période était de 6·6 pour cent. Le nombre d'exploitations agricoles dont l'exploitant possède une partie à titre de propriétaire, et l'autre partie à titre de locataire, était de 9,128 en 1921, contre 8,904 en 1911, soit une augmentation de 2·5 pour cent. Pour connaître l'étendue des fermes louées, on a dû ajouter à leur superficie l'étendue des parties louées des fermes dont l'exploitant possède une partie à titre de propriétaire et l'autre partie à titre de locataire; ce qui donne un total de 2,566,582 acres en 1921, soit 11·3 pour cent de l'étendue totale des exploitations agricoles durant cette année, comparativement à 2,979,078 acres, ou 13·4 pour cent en 1911. Le nombre de fermes dirigées par des régisseurs en 1921 était de 1,538 avec une superficie de 235,665 acres.

Valeur des exploitations agricoles.—La valeur des exploitations agricoles en 1921 s'élevait à $1,691,529,868, contre $1,223,701,549 en 1911 (Tableau IV). Ceci indique une augmentation de 38·2 pour cent, attribuable en grande partie à la différence des prix courants de 1911 à 1921. La plus forte augmentation proportionnelle se trouve dans la valeur de la machinerie et de l'outillage (118·6 pour cent) et la plus faible dans la valeur du bétail (6·8 pour cent). La valeur de la terre a augmenté de 30·0 pour cent et celle des bâtiments de 56·3 pour cent. En 1921 la valeur de la terre était de $795,397,607, ou 47·0 pour cent de toutes les exploitations agricoles; la valeur des bâtiments était de $491,329,609, ou 29·0 pour cent; la valeur de la machinerie et de l'outillage, de $169,953,547 ou 10·0 pour cent, et la valeur du bétail, de $234,849,105, ou 14·0 pour cent. En 1911 la valeur de la terre était de $611,756,794 ou 50·0 pour cent de toutes les exploitations agricoles; la valeur des bâtiments, de $314,377,168 ou 25·6 pour cent; la valeur de la machinerie et de l'outillage, de $77,734,449 ou 6·4 pour cent, et la valeur du bétail, de $219,833,138 ou 18·0 pour cent.

Composition des fermes.—La superficie en terres améliorées en 1921 était de 13,169,359 acres, comparativement à 13,653,216 acres en 1911 et à 13,266,335 acres en 1901. La superficie en récolte des champs était de 9,165,203 acres en 1921, contre 9,683,307 acres en 1911 et 9,212,478 en 1901. L'étendue en vergers était de 180,617 acres en 1921, comparativement à 279,011 acres en 1911 et à 267,112 acres en 1901. Le nombre d'acres en petits fruits était de 9,033 en 1921, contre 12,973 acres en 1911.

Superficie des cultures.—Aux recensements de 1911 et 1921, les énumérateurs ont relevé les étendues des différentes cultures de ces deux années, ainsi que les emblavures, la production et la valeur des récoltes pour l'année précédente; mais, le recensement de 1901 ayant été fait au premier avril, il était impossible de connaître à cette date les emblavures de l'année en cours.

Une comparaison des superficies des différentes récoltes en 1900, 1910, 1911, 1920 et 1921 (Tableau VI) montre que le foin et l'avoine couvraient une plus grande étendue dans chacune de ces années. En 1900 l'étendue en avoine était plus grande que celle du foin, soit 2,707,357 contre 2,606,316 acres, mais l'étendue en foin était plus grande dans chacune des autres années. Le blé occupait la troisième place pour chaque année, mais indiquait un déclin considérable de 1,487,633 acres en 1900 à 870,354 acres en 1910 et 850,525 acres en 1920. Le blé d'inde figurait le quatrième sur la liste pour chaque année, excepté 1900, alors que les pois tenaient ce rang. Cette dernière récolte indiquait un déclin assez considérable en étendue de 1900 à 1920, soit moins de 79,773

acres en cette dernière année, comparativement à 321,996 acres en 1910 et 586,857 acres en 1900. Il y a eu cependant une augmentation correspondante, quoique plus faible, dans l'étendue en grains mélangés, qui s'est accrue de 117,020 acres en 1900 à 323,409 acres en 1910 et à 494,754 acres en 1920. Les superficies des cultures principales en 1920 et 1921, ainsi que la proportion par rapport au total de la superficie sous culture, sont données dans l'ordre suivant:—

	Superficie		Répartition pour cent de la superficie de toutes les cultures	
	1920	1921	1920	1921
Toutes récoltes	9,087,906	9,165,203	100·0	100·0
Foin	3,340,512	3,439,112	36·7	37·5
Avoine	2,760,679	2,850,854	30·4	31·1
Blé	850,525	692,172	9·4	7·6
Blé d'Inde	555,341	565,649	6·1	6·2
Grains mélangés	494,754	546,448	5·4	6·0
Orge	403,065	412,483	4·4	4·5
Pommes de terre	156,082	165,580	1·7	1·8
Sarrasin	115,036	114,260	1·3	1·2
Pois	79,773	83,183	·9	·9

Production des récoltes.—Le Tableau VII présente une comparaison de la production des différentes cultures en 1910 et 1920, et indique aussi l'augmentation pour cent et la moyenne de rendement par acre pour chacune de ces années. Malgré une superficie un peu plus grande, la production du foin en 1920, qui était de 3,567,771 tonnes, a été moindre qu'en 1910, alors qu'elle s'élevait à 4,522,574 tonnes; la diminution étant due à un rendement plus faible par acre. Les chiffres pour 1920 étaient de 1·07 tonnes contre 1·39 tonnes en 1910. D'un autre côté, l'avoine, avec une superficie un peu plus faible en 1920 qu'en 1910, indiquait une plus forte production, soit 97,484,542 boisseaux dans la première contre 89,936,041 dans la dernière année. La moyenne par acre était de 35·3 boisseaux en 1920, contre 31·3 en 1910. La production du blé en 1920 était de 16,440,213 boisseaux, contre 19,842,626 boisseaux en 1910. La diminution dans la production de 1920 était due à une superficie quelque peu plus faible, de même qu'a une plus petite moyenne de rendement. La production du blé d'Inde en 1920, était de 10,481,835 boisseaux, et de 2,964,712 tonnes de blé d'Inde pour fourrage (poids en vert) contre 13,830,703 boisseaux et 2,296,841 tonnes en 1910.

Valeur des récoltes.—La valeur de toutes les récoltes en 1920 (Tableau VIII) était de $235,553,330, comparativement à $140,786,055 en 1910, soit une augmentation de 67.3 pour cent, attribuable en grande partie à la hausse des prix. La récolte du foin était la première en valeur dans chaque année, avec l'avoine, le blé et le blé d'Inde dans l'ordre nommé. Les valeurs de ces récoltes en 1920, ainsi que la proportion pour cent par rapport à la valeur de toutes récoltes étaient ainsi représentées:—

	Valeur en 1920	Pour cent du total
Toutes récoltes	235,553,330	100·0
Foin	69,976,393	29·7
Avoine	54,157,008	23·0
Blé	30,457,005	13·0
Blé d'Inde pour fourrage	13,562,896	5·7
" à grain	6,530,639	2·8
" total	20,093,535	8·5
Total de ces quatre récoltes	174,983,941	74·2

Fruits, sucre et sirop d'érable.—Les fruits dont il est fait rapport au recensement de 1921 sont ceux qui ont été récoltés en 1920, tandis que pour le sucre et le sirop d'érable, il s'agit de la quantité fabriquée au printemps de 1921. Quant aux arbres fruitiers, leur dénombrement se place à la date du recensement, en juin 1921; et on a procédé de la même manière au recensement de 1911.

Le fruit le plus important dans Ontario est la pomme. En 1920 la valeur des pommes s'élevait à 68·0 pour cent de la valeur de tous les fruits de verger, et à 39·2 pour cent de la valeur de tous les fruits et du sirop d'érable. Le nombre de pommiers en 1921 était de 5,724,620, comparativement à 8,783,609 en 1911. Les arbres non en rapport, cependant, formaient une plus petite proportion du total en 1921 qu'en 1911. Cette différence dans la porportion entre le nombre d'arbres "en rapport" et le nombre "non en rapport" est dû en partie aux changements qui ont été apportés dans la composition des tableaux du dernier recensement, qui distinguent plus clairement les arbres fruitiers d'après leur âge. La production des pommes en 1920 était de 9,662,425 boisseaux, comparativement à 6,459,151 boisseaux en 1910. La production des pêches en 1920 était de 983,194 boisseaux, contre 600,187 boisseaux en 1910; il a été produit 538,261 boisseaux de prunes en 1920, contre 346,944 en 1910; 377,775 boisseaux de poires, contre 423,568 boisseaux en 1910; et 345,526 boisseaux de cerises, contre 146,440 boisseaux en 1910.

Il a été produit 33,114,454 livres de raisins en 1920. Ceci est un léger gain sur les chiffres de 1910, qui s'élevaient à 32,594,451 livres. Les fraises, le plus important de tous les petits fruits, ont produit 11,362,041 pintes en 1920, contre 13,094,462 pintes en 1910; les framboises ont produit 6,212,242 pintes en 1920 les chiffres pour 1910 n'ont pas été donnés séparément. Les cassis

et les groseilles ont donné un total de 1,082,623 pintes en 1920, contre 2,420,811 pintes en 1910. Il a été produit 501,299 gallons de sirop d'érable et 63,919 livres de sucre d'érable en 1921, contre 766,337 gallons de sirop et 251,088 livres de sucre en 1911.

La valeur des fruits de verger en 1920 était de $9,574,066, contre $5,564,133 en 1910. Les petits fruits et le sirop d'érable ont donné une production totale de $7,055,952 en 1920, contre $3,086,391 en 1910. La valeur de tous les fruits et du sirop d'érable était de $16,630,018 pour l'année 1920-21 comparativement à $8,650,524, en 1910-11, soit une augmentation de 92·2 pourcent.

Bétail vendu sur pied et abattu.—Le bétail tué dans les fermes en 1920 avaint une valeur de $19,768,561, comparativement à $9,474,294 en 1910, soit un gain de 108·7 pour cent. Le nombre de chaque espèce n'a pas été donné en 1910. Le bétail vendu vivant en 1920 avait une valeur de $79,074,656; les chiffres pour 1910 étaient de $76,490,854, mais il est impossible d'établir une comparaison judicieuse entre les deux années, vu que, dans le but d'éviter toute duplication, le dénombrement de 1920 a été limité aux animaux nés et élevés sur la ferme d'où ils ont été vendus.

Produits animaux.—Ils comprennent les produits laitiers, les œufs, la laine, le miel et la cire. La quantité du lait produit en 1920 était de 4,334,833,782 livres, comparativement à 4,295,977,547 livres en 1910, soit un gain de moindre d'un pour cent. La production sur les fermes en 1920 était de 4,230,424,122 livres, représentant 97·6 pour cent du total. Le nombre de vaches laitières sur les fermes était de 957,491 de sorte que la production moyenne par vache était de 4,418·2 livres. La valeur du lait produit en 1920 était de $96,952,181 ou une moyenne de 2·2 sous par livre; cette valeur a été calculée d'après celle des produits laitiers vendus, laquelle indiquait une augmentation de 123·4 pour cent sur la valeur de 1910, portée à $43,301,044 et représentant une moyenne de 1·0 sous par livre. Il a été produit 33,512,073 livres de beurre de ménage en 1920, comparativement à 63,253,444 livres en 1910.

La quantité d'œufs produits en 1920 était de 56,280,464 douzaines, contre 58,888,614 douzaines en 1910, soit une diminution de 4·4 pour cent. De la quantité donnée pour 1920 on comptait 45,959,808 douzaines, ou 81·7 pour cent produits sur les fermes et 10,320,656 douzaines ou 18·3 pour cent ailleurs que sur les fermes. La production totale des œufs en 1920 avait une valeur de $26,498,249 ou 47·1 sous par douzaine, comparativement à $10,725,733 en 1910, représentant une moyenne de 18·2 sous par douzaine. L'augmentation dans la valeur totale était de 147·1 pour cent.

Le nombre de moutons tondus en 1920 était de 528,287 et la production de la laine de 3,864,606 livres. Cette quantité indiquait une augmentation de 40·0 pour cent sur les chiffres de 1910, qui étaient de 2,760,110 livres. La valeur de la laine en 1920 était de $1,014,646, ou 26·3 sous par livre, comparativement à $607,014 pour 1910, représentant une moyenne de 22·0 sous par livre, soit une augmentation de 67·2 pour cent dans la valeur totale.

La quantité de miel produit sur les fermes en 1920 était de 3,146,198 livres, tandis que la production de la cire était de 42,060 livres. Ailleurs que sur les fermes il a été produit 977,291 livres de miel et de cire, formant une quantité totale de 4,165,549 livres de miel et de cire pour la province, dont 76·5 pour cent sur les fermes et 23·5 pour cent ailleurs. La production en 1910 était de 4,521,740 livres. La valeur du miel et de la cire en 1920 était de $1,035,789, comparativement à $516,658 en 1910. La diminution dans la quantité, de 1910 à 1920, était donc de 7·9 pour cent, et l'augmentation dans la valeur de 100·5 pour cent.

Animaux domestiques, le 1er juin, 1921.—Le nombre de chevaux et mules dans la province, le 1er juin 1921, était de 720,869, dont 669,247, ou 92·8 pour cent sur les fermes, et 51,622 ou 7·2 pour cent ailleurs que sur les fermes. Le nombre total pour 1911 était de 812,214, de sorte que les chiffres pour 1921 indiquent une diminution de 91,345 ou 11·2 pour cent. Le nombre de mules est insignifiant. La valeur des chevaux et des mules en 1921 était de $90,176,979, comparativement à $113,540,859 en 1911, soit une diminution de 20·6 pour cent. Ceci indique pour les chevaux une valeur moyenne un peu plus faible en 1921 qu'en 1911. Comme les classifications selon l'âge, etc., pour les deux recensements ne sont pas comparables, il est donc impossible d'établir une valeur moyenne par classes.

Le nombre de bêtes à cornes était de 2,674,875 en 1921, contre 2,501,536 en 1911, soit une augmentation de 6·9 pour cent. La valeur des bêtes à cornes a augmenté de 49·8 pour cent, de $81,484,809 en 1911 à $122,030,212 en 1921. Le nombre de vaches laitières était de 1,090,866 en 1921, contre 1,032,996 en 1911. Du nombre total de vaches laitières en 1921, on en comptait 1,065,049 sur les fermes et 25,817 ailleurs.

Le nombre de moutons en 1921 était de 979,422 contre 742,188 en 1911, et leur valeur de $6,901,043 en 1921, contre $4,427,565 en 1911. L'augmentation dans le nombre était donc de 32·0 pour cent, et dans la valeur, de 55·9 pour cent.

Le nombre de porcs était de 1,417,705 en 1921, contre 1,887,451 en 1911, soit une diminution de 24·9 pour cent; leur valeur en 1921 était de $14,923,304, contre $13,577,817 en 1911, soit une augmentation de 9·9 pour cent.

Le nombre de poules et poulets s'élevait à 18,623,777 en 1921, contre 13,414,318 en 1911, soit une augmentation de 38·8 pour cent, durant la décade. Le nombre de dindes indique une diminution, de 416,705 en 1911 à 373,437 en 1921; le nombre de canards a augmenté de 293,662 en 1911 à 327,206 en 1921; et celui des oies, de 364,295 en 1911 à 375,200 en 1921. La valeur de toutes les volailles en 1921 était presque le double de celle de 1911, soit $12,134,564, contre $6,128,401.

Il a été dénombré 107,553 ruches en 1921, contre 124,082 en 1911; leur valeur en 1921 était de $1,169,754, contre $673,687 en 1911. La diminution en nombre était donc de 13·3 pour cent et l'augmentation en valeur de 73·6 pour cent.

TABLE I. Population, Farm Holdings and Areas, 1901, 1911 and 1921.

TABLEAU I. Population, fermes et superficies occupées, 1901, 1911 et 1921.

Item	Item	1921 June 1	1911 June 1	1901 March 31

Maple syrup produced	Sirop d'érable produit	gals.	501,299	–	501,299	766,337
Maple sugar produced	Sucre d'érable produit	lb.	63,919	–	63,919	251,088

[1] Areas and number of trees and vines are for the census year. Production and value of maple syrup and sugar are for the census year and production and value of fruits are for the year preceding the census.

[1] Superficies et nombre d'arbres et de vignes sont pour l'année du recensement. Production et valeur du sirop et du sucre d'érable sont pour l'année du recensement, et production et valeur des fruits sont pour l'année précédant le recensement.

[2] Trees not on farms in 1921 were not distinguished as "bearing" or "non-bearing".

[2] Les arbres non sur la ferme en 1921, n'étaient pas différenciés comme en rapport ou non en rapport.

[3] Crab-apples in census of 1921. Kind not specified in census of 1911.

[3] Pommettes au recensement de 1921. Espèce non spécifiée au recensement de 1911.

[4] Included with "Other small fruits." [4] Compris avec "Autres petits fruits."
